
AVOID UNLIMITED ACCOUNTS

- Many hosts sell “unlimited” accounts that host multiple sites
- If one site is compromised they are all compromised
- Use separate accounts for separate websites

HARDEN YOUR SERVER

- Probably only applies to a VPS or dedicated server
 - Can greatly increase your website's security before they get to the WordPress installation
 - **Fail2ban**
 - Actively watches logs and blocks connections
 - Requires a plugin to protect the WordPress login
 - Server firewall
 - Allow users to access only the services they need and only when they need them
-
