
EXTERNAL DETECTION TOOLS

- Don't rely on tools within the site itself to tell you there's a problem
 - Often an attack will disable known reporting and other tools
 - I recommend
 - **Jetpack** - <https://jetpack.me>
 - **New Relic** - <https://newrelic.com>
 - **Google Search Console** - <https://wordpress.org/plugins/csp-manager/>
-

INTERNAL DETECTION TOOLS

- Watch user actions:
 - **Stream** - <https://wp-stream.com>
 - **Solid Security** - <https://solidwp.com/security/>
 - Detect file changes:
 - **Wordfence** - <https://wordfence.com>
-
