USE YOUR OPERATING SYSTEM

> Firewall

> Disk Encryption

> Account Protection

USE A VPN

> Accessing resources without encryption can allow a hacker to intercept your credentials

> If you share passwords a compromise to 1 site can be a compromise to all of them

> VPN (Virtual Private Network) encrypts all traffic between your computer and its services

>> Protects your WiFi connection when you're not at home.

> I recommend

>> **ProtonVPN** - https://protonvpn.com

>> **TailScale** - https://tailscale.com
